JefNet, Distributed genetic programming framework for the Java language ... Watchmaker, Extensible, high-performance, object-oriented framework for .... In this paper we propose a technique to implement clustering using genetic algorithm in a parallel fashion using hadoop mapreduce. To do so we extend the coarse grained parallel model of genetic algorithms and perform a two phase clustering on the data-set.. Distributed Processing - Support for distributed fitness evaluations using either Hadoop (via the Apache Mahout project) or Terracotta. Swing Component Library - Re-usable components to simplify the building of graphical user interfaces for evolutionary programs.. This project implements a genetic algorithm with both serial and parallel ...
